

WHITE PAPER

Welcome to **PRESA CANARIO TOKEN**

There are so many dog token on the market and they actually don't have any real projects. Almost all of them keep the investors busy with the dream of becoming 1 dollar, and cannot even realize a simple project. We are here to help millions of meme token investors make their dreams come true.

First, let's talk about our project. Presa Canario Token bears the name of a dog breed because it is influenced by more than one fashion, is not active in a single field, and aims to make the investor smile on every agenda.

This strategy is based on the following example; PREC Token will be affected while dog tokens rally, PREC Token will be affected as NFT 2.0 is on the agenda in the future. The PREC Token will still be affected while the game tokens are on the docket. This means accessing the potential to continuously attract new investors for PREC Token.

Although it is a dog token, the PREC Token will be used for NFT exchanges. We will introduce you to the world's largest NFT market project with 2 stages, which we are developing, in the not-too-distant future. As it is known, the first stage of the NFT market consists of GIFs, Images and videos. In the 2nd version, we are breaking new ground in the world and opening the Game Assets NFT market.

This market is a project that the entire game industry needs, and that will save the assets made by the creators from the problems that arise due to the use of someone else. It will prevent the Assets made by people from being used by others, and will be able to obtain the Assets from the market where they can make fast and best choices.

Our goal in the game industry is to solve many problems with this market. The game market needs this very much, all games use a few ready-made assets. Thanks to our market, these games will diversify, multiply and their content will be much richer. The producer can convert his game Assets to a single piece NFT so that they will not be seen in any other game, or he can make multiple NFTs and allow them to be used in several more games, in this way, a use will make the PREC Token a kind of notary of the game industry. In this way, game assets traded for games will now be NFTs! This is a first in the world and will bring a new breath to the NFT movement. Taxes collected in the NFT market will be burned by purchasing Presa Canario Tokens, and some of them will be used in NFT market expenses.

To begin with, Marketing, developer and team wallets will be locked, and there will be no private sales. We will liquidate Pancakeswap with our own means. 4% tax will be deducted in each transaction, 2% of the tax will be burned, and the other 2% will be distributed to the people who keep their tokens in wallets such as Trustwallet or metamask at the rate they hold. Over time, the dead wallet from which the tokens burned out will grow and since it has a large amount of tokens, it will attract a large part of the share distributed to the holders, that is, it will be a black hole system.

The dead wallet will grow and attract more tokens, we have arranged the supply and burning in such a way that, in spite of those who make us dream of high prices and make us dream in vain, the price starting with a lot of zero will see the numbers in your dreams. With the super-fast burning and black hole effect, the supply will decrease rapidly. Tokenomics will be very simple and fair, unlike most tokens. Many tokens own 70% of the amount, but we will grow with our project, not with the money of the investors...

As PREC Token, we have established a partnership with a game company, and we are planning to make its investors laugh with innovative play to earn and NFT Game games in line with the investor's request. During the updates about the game, information will be made through official channels. In order not to steal our game projects, we are not revealing these projects at the moment. Our project is a community project as well as being NFT, dog token and game token, initially there is a token wallet reserved for the army. Army also aims to make the investor himself work on advertising and be rewarded for his advertising work. Volunteer investors who regularly participate in advertising activities will be rewarded, you will be able to earn income from here.
